

keeping IT safe

Your data is the life-blood of your organisation - don't let it flow away.

Wouldn't you love to know it's safe?

don't lose IT

From e-mail and web-sites to on-line database storage and disaster recovery scenarios, we're here to make sure that you don't lose what's important to you.

For so many organisations, backing up their data is a real chore. Traditionally tapes have been the answer and whilst they can be easy to implement, they end up being costly and extremely labour intensive as you trawl through tapes trying to find some piece of critical data.

And that's if they find it! Over 40% of all backups done to tape are unable to recover the files they're supposed to be backing up.

So what's the answer? Off-site, on-line backup that's what!

We are partnered with the biggest provider of off-site storage in the UK and we can provide you with a zero-maintenance, ultra-secure backup & recovery strategy. We use IBM's award winning software, Tivoli, and we can

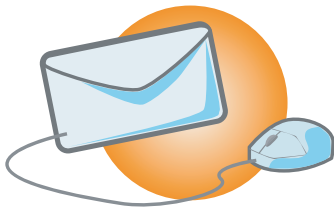

provide client software for virtually any OS inc. Windows (NT/95 or later), Mac OS 9, Mac OS X and most versions of UNIX or Linux

And that's not all we can help you with. We host our own web, e-mail and database servers (Filemaker, Lasso, PHP & MySQL) at our data centre in the Docklands, with each server connected via at least 100Mbs connection to the Internet.

Whether you require help in setting up your own domain, e-mail accounts for

your company or anything else to do with your on-line presence, we're there to help you with it.

We've listed a selection of our services below but we aim to be flexible, so if you need something more different, give us a call on 0845 658 5714 and we'll work something out for you.

REMOTE SERVICES RATES

DESCRIPTION	RATE (£)	QTY
Remote off-site on-line backup, storage & recovery facility. Prices are per 1 Gb of data stored (up to 100Gb - for prices above 100GB please call 0845 658 5714)	9	MNTH
Remote off-site on-line backup licence one-off fee:		
• Standard Licence	99	
• MS Exchange Licence	399	
• MS SQL Server	399
